“Reef”

The wind light fascinates with the reflections of light and the dancing shadows. A removable cylinder made of heat resistant glass protects the flame from wind and thus allows the usage in the garden and on the terrace.

Since medieval times, pewter has been used for table top items and has been the most important raw material for a very long time. The popularity of pewter first started decreasing in the 18th and 19th century by the progressing development of glass and the increasing popularity of porcelain. Since then, the usage of pewter has focused mainly to decorative elements. Up-to-date pewter is 100 % lead-free and therefore uncritical when used for food.

Please note:

For tealights or candles up to a height of 10 cm and a diameter of 7 cm.

With candlelight, this extraordinary lighting object creates fascinating effects and provides for a cosy and comfortable ambience.

The filigree rods are made of brass and manufactured piece by piece in traditional sand casting. Afterwards they are soldered onto a solid baseplate with an elevated rim. This baseplate avoids the leakage of wax and protects the table surface from the heat.

Additionally, it forms the frame for a removable cylinder made of heat resistant glass, which by way of its satined surface, intensifies the mood of the light and protects the flame from wind at the same time.
