"Glow" – reframing the buffet!

Filigree displays and frames with integrated lighting form the basis of the "Glow" system.

The matt black coating of these slim but still extremely sturdy lighting objects remains discreetly in the background and leaves the presentation of dishes to the warm and glare-free light.

"Glow" is a flexible system that creates unmatched buffet stagings. The filigree construction not only allows food and beverages to be presented on the displays, their interior space also creates enough space to effectively present delicacies in the right light.

All elements can be used lying or upright and create presentation levels at different heights. This is the basis for varied and appealing buffet arrangements.

Two connecting boards made of bent sheet metal can be attached as desired and thus enable the flexible construction of several elements – even across corners. Matching buffet platters made of glass or laminated plastic, as well as trays made of melamine, complete the system.

Zieher buffet systems have been inspiring with innovative lighting concepts for many years. In "Glow", this is now firmly integrated for the first time. The resulting subtle look of these lighting objects creates completely new facets of atmospheric buffet ambiances.

spacer/buffer
magnetic, black, rubberised, for non-slip and noiseless placement under buffet platters and trays on LED Displays GLOW (items 8400...)

item	Ø in cm	thickness in mm	PU

LED display "Glow" L
steel, matt black (powder coating), with 2 circumferential LED stripes (warmwhite), incl. 2 connections for power supply and -forwarding

Art.-Nr.	L x B x H in cm
8400.32	48x48x32

Components of the system:

- The illuminated cuboids offer, due to the two integrated connection sockets, the possibility of operating up to three elements on one power supply.
- Illuminated frames can be placed horizontally and thus enable the effective lighting of translucent buffet platters. When set up, they fit into the height grid of the buffet cuboids and thus function as a space-saving support for attached connecting boards.
- The connecting boards are made of powder-coated sheet metal and allow a two-sided use. They can simply be hung between the cuboids and frames, creating additional presentation levels and areas.
- Precisely fitting glass platters of various types and platters made of black laminated plastic make it possible to quickly and easily close the top of the illuminated cuboids. Various melamine trays from the range can also be used on some of the cubes. In the lying position, there is a large selection of suitable glass platters from the Zieher range available (50 x 50cm / 50 x 42cm / 42 x 42cm). These buffet platters are available on pages 56 to 59. If the cuboids are positioned upright, they can be covered with laminated plastic platters.
- Rubberised magnetic buffers ensure the non-slip and noiseless support of all platters and trays. These are available as accessories and can be placed anywhere on the displays and frames. Furthermore, they create the necessary distance in order to place glass or laminated plastic platters in spite of the attached connecting boards.

Accessories LED lighting:

- The power supplies are available with EU, US and UK plugs. The power of the supplies is sufficient to connect up to three cuboids or frames. Since each cuboid has two connection options, they can be strung together without any problems. As they only have one connection option, the two frames form the end of the chain. The energy-efficient LED lighting in warm white colour is operated with harmless 24 volts.
- Connecting cables with angled plugs are available in two lengths and help to keep the number of cables required as low as possible in numerous setups.
- Shapely and reusable cable holders made of durable silicone help to lay and fix power- and connecting cables inconspicuously or to bundle several cables.

connecting cable "Glow"

black, with angled plugs, for daisy chaining LED displays items 8400... and -frames items 8405...

item	length
8418.01	1 m
8418.02	2 m
